# MESSAGE FROM MANAGEMENT

---

We believe a business is not successful if it is only committed to profit. It has to be an activity which creates prosperity and well being for all those who are connected with it directly or indirectly. Profit is only a by-product reflecting how well we are carrying out the business activity.

---

## OUR MISSION

To serve the esteemed customers and to contribute to rebuilding Iraq and support Oil & Gas Companies, Power generation plants & power distribution substations which are working in Iraq with excellent services.

## OUR VALUES

- Safety – Embracing a culture to Protect our employees & Clients
- Integrity – Being Honest & doing what is right
- Talent – Keeping the best
- Quality – Delivering what is required
- Customers – follow up & healthy communication with client
- Result – meet Customer satisfaction

# 24+ YEARS OF EXPERIENCE

ALKHORA is built upon the strengths of several individual, complimentary areas of expertise which create a cohesive team enabling us to successfully accomplish tasks as a single, interconnected and seamless organization.

# WHY US

ALKHORA draws from the background of real-world extensive experience in Iraq. With our intimate knowledge of Iraqi culture and laws, we can easily navigate through the rules and regulations of this unique work environment.

## Our Commitment to safety, Health and Environment

ALKHORA foster a culture that is founded on putting safety first. Our continuous development of safety controls ensure that work is performed using safe work practices and adherence to environmental control. From Basic workplace safety measures to Handling Hazardous, ALKHORA continuing training their staff increase their skills to safely execute the work complying with OSHA standards and our client's requirements.

Attention to Details

A Plan for Success

Creativity

Experts Only

Award-Winning

**Our financial stability allows us to operate debt free supporting numerous contracts over all regions of Iraq.**

# OUR SERVICES

ALKHORA is well-known as a dependable and timely provider for a commercial & Government entities operating in the fast paced and ever-changing environment of Iraq.

## NUCLEAR POWER SYSTEMS

Nuclear power has one of the lowest levels of fatalities per unit of energy generated compared to other energy sources. Detection of radiation and various stages of nuclear power production – from mining to Nuclear fuel production, fission, environmental impact, and spent fuel storage – require accurate measurements of radiation routine operation of a Nuclear power plant. Additionally, to avoid accidents such the Chernobyl disaster in the Soviet Union in 1986, the Fukushima Daiichi nuclear disaster in Japan in 2011, and the more contained Three Mile Island accident in the United States in 1979.

---

## HEALTH & MEDICAL PHYSICS

### ***Ionizing Radiation***

Ionizing radiation cannot be avoided. It also has been beneficial to human beings in areas ranging from medical diagnosis and therapy to scientific research to generating electrical power. However, when used in large quantities or in unsafe ways, ionizing radiation can harm living organisms.

Care must be taken to properly use equipment and to minimize the potential for unnecessary radiation exposure to individuals or environmental contamination in medical, research, or power generation activities. The health physicist is prominent among scientists charged with controlling the beneficial use of ionizing radiation while protecting workers and the public from potential hazards.

# Providing the Solutions You Need

## Medical Physics

It is a medical physicist's responsibility to design, develop, test and assess these factors, using specialist knowledge of radiation physics and other technical disciplines. Both Health physics and Medical Physics is devoted to radiation detecting and quantifying the amount of radiation exposed to humans and their safety.

## BORDER, PORT, ACCESS MONITORING

The nuclear power renaissance and the growth of requirements in the areas of homeland security to prevent the illicit trafficking of nuclear material. In addition countries are eager to monitoring airports, seaport, cargo and important nuclear facilities for unauthorized movement of radiation and harmful products or items.

ALKHORA offers systems for users in Nuclear Power Plants, Homeland Security Agencies, Customs and Border Patrol, National Atomic Energy Agencies, Nuclear Regulatory Agencies, Hospitals, and in Research Establishments worldwide.

## AIR QUALITY

Awareness about air pollution is growing day by day as are the number of diseases and symptoms that are caused by or exacerbated by poor air quality, but even now, in the 21st century, many people are oblivious to the facts and true health impacts of modern day urban air pollution.

Unlike the smogs and "pea-soupers" of the 1950's, modern day air pollution is largely invisible. You can't see it, smell it or taste it, but it ranks in the top 5 killers and costs the UK economy billions of pounds per year in lost productivity and places enormous strains on the health system.

ALKHORA provides scientific instrumentation, systems and services to help government, local authorities, industry, academia, agencies and consultants to accurately and reliably quantify the concentrations of various dangerous air pollutants so that data can be produced and made publicly available.
